SUMMARY

Business Analyst with 1+ year of experience using SQL, Python, Excel, and Power BI to analyze business and product data, build KPI dashboards, and deliver data-driven insights. Experienced in data cleaning, exploratory analysis, visualization, and translating analytical findings into business recommendations.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Matplotlib), SQL
Database: PostgreSQL, MySQL.
Visualization Tools: Power BI (DAX), Tableau, Excel (Power Query, PivotTables, Power Pivot)
Data Engineering: ETL, dbt, Apache Airflow
Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Hypothesis Testing, Funnel Analysis, Cohort Analysis
Practices: Agile, Git/GitHub

EXPERIANCE

Business Analyst - Shakham Inc. *Sep 2025-Present (Pune, India)*

- Analyzed 7–8 competing products across **10+ KPIs, benchmarking features** and performance to identify product gaps and provide data-backed recommendations for feature development and prioritization.
- **Developed 4+ analytics dashboards** and KPI frameworks to track product and user-performance metrics, enabling teams to identify user behavior patterns and make data-driven product decisions.
- Collected and analyzed 500+ customer responses through structured questionnaires, performing data cleaning, transformation, and correlation analysis in Excel to uncover customer preferences and insights that informed product development.
- Created and standardized BRDs, FRS, and SOPs for cross-functional teams, reducing recurring presentation and documentation effort by **30–50% and streamlining project execution.**

PROJECTS

Open-Meteo Weather Data Analytics Pipeline | *Python, Apache Airflow, SQL, dbt*

- Analyzed and processed **500+ timestamped weather records across 3 cities** using **Python, SQL, and PostgreSQL**, enabling historical trend analysis across temperature, humidity, precipitation, wind, pressure, and cloud-cover metrics.
- Built a **3-model dbt analytical warehouse** across staging, intermediate, and mart layers, transforming raw API data into structured datasets for **time-series analysis, city-level comparisons, and KPI reporting.**
- Automated hourly data extraction, PostgreSQL loading, and dbt transformations through a 3-task Apache Airflow pipeline, replacing repeated manual execution with scheduled end-to-end data processing.
- Implemented **3 automated data-quality tests** covering uniqueness, range validation, and referential integrity, and exposed processed data through **FastAPI and a React dashboard** for interactive weather analysis and visualization.

eBook Orders Sales & Customer Analysis Dashboard | *Excel, Power BI, DAX*

- **Cleaned and transformed 744 hourly records** covering one month of eBook sales data by restructuring the original wide-format dataset into a 4-field analytical dataset using Excel Unpivot, enabling consistent time-based analysis.
- **Analyzed 1,769 orders and 4,310 books sold** to identify sales trends, seasonal patterns, and purchasing behavior, highlighting strong sales activity in **late December/early January** and a decline in mid-January.
- Built a **Power BI dashboard with DAX** measures and calculated fields to analyze hourly and day-type performance, identifying **10 AM–8 PM** as the dominant purchasing window, **accounting for 1,257 orders and 3,136 books.**
- Compared weekday vs. weekend purchasing patterns, **finding 3,236 books sold on weekdays vs. 1,074 on weekends**, and translated the findings into recommendations for weekend promotions, seasonal campaigns, and customer retargeting

EDUCATION

Institute of Management and Career Courses (SPPU) | Pune, India Dec *2024- Apr 2026*
MBA (Business Analytics) | CGPA: 8.21

Kavyitri Bahinabai Chaudhari North Maharashtra University. | Jalgaon, India *June 2020- Apr 2023*
Bsc. Chemistry | CGPA: 9.13
